

Integrated coin changer telemetry

Vending
Transportation
Retail
Kiosk

All – In – One Telemetry

Easy, mobile readout
of Audit data

Alarm function in case
service is required

No monthly costs – you
decide when to read out

Integrated coin changer telemetry

currenza  **airport**

Currenza airport system is the integrated telemetry option of the currenza c² coin changer. No additional devices need to be installed – and it's as easy as reading out manually – only quicker and more cost efficient.

reddot design award
winner 2009

Profitability:

- Remote data transmission of audit and machine data via mobile network allows cost-efficient route planning
- Cost-efficient solution because no monthly costs involved due to pre paid SIM card you can decide whether the c² should send messages
- Optional SMS messages about service events – you can react quickly, reducing machine in c² -down time
- All in one telemetry – no additional devices in the machine are needed

Alarm function:

- Alarm function in service-case – you can react quickly, maximising machine up-time
- Alarm function if vending machine door open
- Optional SMS feature for selectable alarm functions

Functionality:

- Data received via GSM module - **currenza**  **airbox** in the backoffice
- Data processing with free of charge WinAirport software
- Optional send SMS from the **currenza**  **airport** to preselected phone number

Data collection & structure:

- Cashflow data from the connected payment systems
- Enhanced vending machine data via DEX, EXE, BDV, the cashless system currenza clip or the universal audit box, currenza audimax
- Machine diagnostics via error report of the coin changer in EVA-DTS format

Additional features:

- Scheduled readout of selected vending machines
- Remote firmware & configuration updates e.g. prices
- Flexible SMS alarm system
- Machine out of order message alerts after preselected time frame to control machine vend function

With currenza airport you have control over your payment systems and Vending machines – anywhere, at any time.
