currenza

Optional coin changer security system

currenza c² security

The currenza c² coin changer is protected against coin theft by electronic recognition of the removal of tube cassettes and coin validator.

Security at your machine:

- Various studies came to the conclusion that up to 5% of cash is lost through shrinkage at vending machines
- Sealing the coin changer is often time consuming and uses a lot of human resources

The currenza c² security sensors:

- The coin changer is monitored by sensors that are not directly visible:
 - 1) removal of coin validator – monitored by security sensor 1
 - 2) removal of tube cassette – monitored by security sensor 2

Data recording:

- Data provided in standard EVA-DTS format
- Data storage of the last 100 service activities
- additionally registers times and dates of cassette and coin validator removals
- Data read out with:

- NRI USB Audit Stick via IrDA or printer cable
- **currenza c² airport**: integrated c² coin changer telemetry
- **currenza c² clip** data key
- **currenza c² audimax** universal audix box
