## Scheme of operation

Choose product.

Payment by banknotes. Accepts banknotes up to 100 € with the maximum security thanks to new security checks.

Mechanical reader that allows reading from 0.05 to 2 €

Recognition of age, enables the sale of certain products if the user is an adult.

Large display that shows all the data relating to the sale and allows you to change all settings through a vandal-proof keypad with 16 keys.

Product delivery.

Transport of the product through robotic elevator that allows you to sell delicate products even in higher floors.

Thermal separator opening through an automatic closing above the drawer which avoids the release of cold and acts of intrusion detection.

Delivery of the product through the system of opening of the drawer toward the outside, it holds the sold product and it facilitates the collecting thanks to the opening toward the outside

## PHARMA 24H™

The new way to increase sales by improving the image of your service

### A simple and effective operation
